Armourvent® Multi Plus

Your Benefits:

- Extend the life of your roof and of your shingles
- Increase your living comfort
- Allow excess heat and water vapour to escape from the roof
- Allow air to circulate between insulation and roof deck
- Prevent humidity from damaging the roof construction
- Cool down the roof in hot weather conditions
- Prevents ice-dams after snow

Ventilating your shingles roof will equalise the temperature of the outer and inner roof. Your roof structure will then be able to withstand sudden temperature changes.

- **Armourvent® Multi**

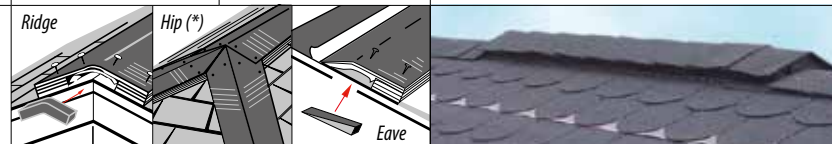

ventilation system provides you a fabulous roof without visible appliances. The unique design consists of a thin but ultra-strong profile ensuring a smooth, straight and virtually invisible roofline.

- **Armourvent® Ridge**

are designed to ensure a smooth straight roofline; thanks to their internal baffle system, they keep out rain, snow, leaves and insects.

- Armourvent® Standard**
 are plastic and large size vents allowing a high degree of ventilation.
- Armourvent® Special**
 are trendy new vents in plastic designed in such a way that they are hardly noticeable on a shingle roof. The special protective coating make them a durable solution; their angled internal baffle keeps out external elements like birds, insects, snow and water.
- Airhawk® Turbinevent**
 for ventilating large roof surface.
 All aluminium construction with maintenance-free top.
 Excellent solution for cold roof structure
